DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-11, drawn to apparatus, classified in class 128, subclass 206.19.
- II. Claims 12-20, drawn to business methods, classified in class 705, subclass 14.

The inventions are distinct, each from the other because of the following reasons:

Inventions group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the respiratory mask can be used to perform its function without the advertisement being on the mask. The subcombination has separate utility such as treating the mask as a billboard to advertise a product.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

A telephone call was made to Bradley K. Groff on March 22nd, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3743

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
